Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the claimed process for hydroprocessing a petroleum feedstock, said feedstock containing both nitrogen and sulfur, said process comprising contacting a feedstock with a bulk multimetallic catalyst represented by the formula $(X)_b(\text{Mo})_c(\text{W})_d\text{O}_z$, wherein X is a Group VIII non-noble metal, and the molar ratio of $b:(c+d)$ is 05//1 to 3/1, $z = [2b + 6(c+d)]/2$, and wherein the process is performed specifically claimed and recited conditions of temperature, pressure, gas rates, and liquid hourly space velocity.

The bulk multimetallic catalyst formulaically recited in the instant claims is not taught or suggested by the cited references of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
